

## SKIOLD DAMAS PS120 PRE-CLEANER

SKIOLD MAKES THE DIFFERENCE!

### SKIOLD DAMAS PS120 PRE-CLEANER

Compact pre-cleaner designed for grain and seed

Industrial working principle

Capacity up to 200 t/h (wheat/barley)

Quick exchange of screens

Easy access to the inspection of the screens

# SKIOLD DAMAS PS120 PRE-CLEANER

The SKIOLD Damas PS120 Pre-Cleaner is designed for efficient cleaning separating both under and oversized impurities from different sorts of raw materials for e.g. wheat and barley. The pre-cleaner meets the increasing demands to remove dust emission due to its sealed design and preparation for an additional dust filtering unit if required. A presuction module features a system with aspiration compartment and auger for discharge of light waste.

SKIOLD supply a range of screens and the size of the holes of the upper screen must be adapted to the materials to be cleaned, the required cleaning effect and capacity. On request the cleaner comes with special sieve trays with rubber balls ensuring self-cleaning screens.

TECHNICAL SPECIFICATIONS	PS120
Max. capacity (T/h)	200
Motor (kW)	7,5
Number of screens	4
Screen area (m²)	12
Weight, excl. presuction (kg)	2900
Air amount, presuction (m³/h)	4000
Motor, presuction (kW)	0,75

FUNCTION	
Pos.	Explanation
1	Inlet (grain)
2	Upper screens
3	Lower screens
4	Large waste
5	Cleaned material
6	Small waste
